SUBJECT INDEX TO VOLUME 47

A Blocked-Off-Region Strategy to Compute Fire-Spread Scenarios Involving Internal Flammable Targets, 419

A Distributed Resistance Analogy for Solid Oxide Fuel Cells, 573

A Lattice Botzmann Model for Convection Heat Transfer in Porous Media, 157

A Level Set Method for Incompressible Two-Fluid Flows With Immersed Solid Boundaries, 473

A Meshless Method Based on Least-Squares Approach for Steady- and Unsteady-State Heat Conduction Problems, 257

A New Efficient Algorithm for Solving an Incompressible Flow on Relatively Fine Mesh, 593

A New Formulation Toward Unifying The Velocity Role in Collocated Variable Arrangement, 361

A New Method for Numerical Treatment of Diffusion Coefficients at Control-Volume Surfaces, 491

A Numerical Procedure for the Laminar Heat Transfer in Curved Square Ducts, 135

A Numerical Simulation of Fluid–Structure Interaction in Internal Flows, 403

A Numerical Technique for Computing Effective Thermal Conductivity of Fluid–Particle Mixtures, 555

A Parallel Genetic Algorithm for Heat Conduction Problems, 97

A Two-Dimensional Scheme for Axisymmetric Radiative Heat Transfer Using the Finite-Volume Method, 199

Accurate Solutions for Radiative Heat Transfer in Two-Dimensional Axisymmetric Enclosures with Gas Radiation and Reflective Surfaces, 39

Design, Formulation, and Solution of Multidimensional Inverse Heat Conduction Problems, 111

Development of Multiphase and Reacting Turbulence Models, 179

Finite-Volume Approach to Thermoviscoelasticity, 213

Fourth-Order Finite-Difference Method For Third-Order Boundary-Value Problems, 383

GDQ Method for Natural Convection in a Square Cavity Using Velocity–Vorticity Formulation, 321

Implementation of Clear Algorithm on Collocated Grid System and Application Examples, 65

Input Estimation Method Including Finite-Element Scheme for Solving Inverse Heat Conduction Problems, 277

Mathematical Model of Heat and Mass Transfer During Crystal Growth Process Including Cluster Model of a Melt Constitution, 459

Modeling Multiphase Flows Subjected to Centrifugal Acceleration with a Mixture-Averaged Drift-Flux Algorithm, 303

On Numerical Solution of Strongly Anisotropic Diffusion Equation on Misaligned Grids, 533

Parallel Computations of Radiative Heat Transfer Using the Discrete Ordinates Method, 19
Power-Series Method for Two-Dimensional Heat Conduction Problems, 239

Statistical Characteristics of Unsteady Reynolds-Averaged Navier–Stokes Simulations, 1f

Three-Dimensional Modeling of Density Variation Due to Phase Change in Complex Free Surface Flows, 507

Transient Radiation Heat Transfer Within a Nongray Nonisothermal Absorbing-Emitting-Scattering Suspension of Reacting Particles Undergoing Shrinkage, 443
Two Cartesian Grid Methods for Solving the Poisson Problem in an Arbitrary Domain, 291
Two Finite-Element Schemes for Steady Convective Heat Transfer with System Rotation and Variable Thermal Properties, 343
